

KPCA Membership supports plan to create the Nissequogue River State Park Foundation

KPCA officers explained our plan to create a foundation consisting of a coalition of community groups to oversee and help create a visionary and inspirational state park on the grounds of the old Kings Park Psychiatric Center. KPCA members overwhelmingly supported the idea. It would be determined that the foundation would be independent of the Kings Park Civic Association but select KPCA members will be our representatives. All matters pertaining to the property would be handled through the foundation but updates and progress reports will be given at monthly KPCA meetings.
